

## Emergency Operations Update

Friday, August 27th, 2021

Good afternoon Chimnissing,

Beausoleil First Nation Health Centre will be hosting a Covid-19 vaccination clinic (Pfizer) today, August 27th, 2021 at the Event Centre. Hours of operation are 1130am until 330 pm. This clinic will operate as a walk in service.

This clinic is open to all who require either a first or second dose, including those who will be turning 12 years old this year.

A friendly reminder that the Non-Resident visitors form for membership is still active and used for contact tracing purposes. Due to the lack of cellular reception at Cedar Point, it is recommended that you either download your pdf response, or take a screenshot to show upon arrival. Please note the approval is a conditional approval only, Chimnissing remains closed to the general public and those misusing the form will not be given clearance.

The Delta variant continues to climb in case counts, including in our region. Please continue to practice all of your personal safety protocols when travelling and in public spaces. The new school year is upon us soon, and we are out and about preparing for the kids returning to school...Mask, wash/sanitize and physical distancing, safe shopping everyone!

As always, be safe,

*Emergency Operations Team*
