

# *Commitment To Chimnissing*

**Ahneen Chimnissing; my name is Robin Copegog, I'm a husband, a father and grandfather. My loyalty is to my family and the community of Christian Island. I have worked for 7 years with the transportation department and another 10 years of and on with the public works department. Plus 12 years off reserve. I strived to work hard each day at every job that I had, and I'll be committed to do the same as a councillor if elected in the up coming elections.**

## *Objective*

**My objective is to promote healthy and stress free living on the Island. Healthy living- we need to promote this issue, use the rec centre, get people to quit smoking, maybe an indoor pool, everyone likes to swim so why not all year round? Stress Free- everyone has bills that pile up, I've seen and heard people talk about how high their hydro bills are. Why not look into different ways we can help lower those bills. With the new 3 phase system that is coming we can maybe have a solar farm tucked away on band land somewhere. This will could lower bills and have hydro pay us instead.**

There are many great projects on the go right now, but there is a greater opportunity coming if we as a whole jump on the band wagon. I'm talking about the legalization of marijuana. If we get into the business of growing and cultivating medical marijuana, this would generate income for the community. Not to mention more jobs, it's a million dollar business, this could lead us to be less dependent of government handouts. Build our own homes with our own money, increase salaries with our own money.

**That will be my focus if elected in the up coming election!**

**Miigwetch.
