

OUR LIFELINE

Transportation continues to be the leading issue and the need for a new ferry remains outstanding.

My years of working with all levels of government became exhaustive at how we achieve the success of a new transportation initiative.

I previously looked at ways to procure our own ferry without government assistance and feel this needs to be our priority.

In my years of working with government on major capital projects, I have learned that the INAC system is bureaucratic and delays projects and only works on their system. It is time we secure a means to work with government on OUR terms, not theirs.

We must be the voice to our own autonomy!

WHAT'S IN STORE?

In the past 2 weeks, I have reviewed past pamphlets from previous campaigns and now realize I must concentrate on the work before us and with the assistance of a hard working Council we could derive a system that proves beneficial to **community growth, community wellness** and the **future** of generations to come.

I believe in thinking **outside of the box** and working towards developing our community without outside government influence or guidance. We need to teach our new and upcoming leaders to think the same; or we will never break free of the Indian Act if we do not do it ourselves.

The key to the future is clearing that path for our future leaders to follow.

Thanks for listening, I will see everyone on speech night and will also be around the community up to election day on **June 23, 2018**.

ROLY MONAGUE

2018-2020

100th anniversary of the Battle of Vimy Ridge, April 2017 near Arras, France

AHNEEN KINA WEYA!

I would at this time like to acknowledge Veronica Blanchette for the vote of confidence in nominating me as chief for the upcoming term 2018-2020, and to M. Renee Jamieson for seconding the nomination.

I respectfully accept this nomination.

My Name is Roland (Roly) Monague, I am the former Chief of Beausoleil First Nation from 2010 – 2016. I also served on Council from 1996 to 1998, then again from 1998 to 2000. I took a short break from politics from 2000 to 2002, however returned to Council from 2002 to 2006.

I am very familiar with all aspects of First Nation politics with 4 terms as Councillor and 3 terms as Chief.

The role of chief is one that is very demanding, and as such, I accept the challenge **ahead!**

MUCH WORK AHEAD!

The outstanding work that lay ahead, I believe requires the utmost attention. My **experience** in First Nations politics will certainly be an asset as I believe the projects that await the newly elected Council can be overwhelming if entering this term into unfamiliar territory.

During my past term as Chief, I was the Chair of the Board of the Williams Treaty First Nations. I understand the claim has now been settled and will provide much needed new monies and **assurance** again to our First Nation, much similar to the Coldwater Settlement of 2012.

I will ensure these monetary returns will **benefit** our present members as well as our future generations.

I do not want to make any promises and based on experience and previous campaigns, promises are short lived and not realized until you enter your term and assess and re-assess how to move ahead.

Working together and getting organized is key in this demanding role. Prioritization of work is also key to see projects to fruition. With the ongoing work of our Community Plan, community members will be in the driver's seat on how we build our community now and into the future. The community plan will be the tool and guideline we will use to realize the projects that members have proposed for our community through goal setting exercises throughout the past year.

Prioritized goals will be outlined in our community plan and objectives on how we achieve these specific, realistic and timely goals in the short, medium and long-term of our community!

COMMUNITY

As stated, I have had time in the past two years to reflect, using that time to see things with an open mind and look at things objectively through another lens.

I see the needs from an educational perspective to support all goals and the educational needs of our community.

I also see our needs from a health perspective and the ability to assist our members who require help and assistance for social, mental and physical well being.
