2015 Season

**RE: Inspections, Boundary Location & Identification
Big Sand Bay & Lighthouse Subdivisions**

Dear Lessee(s):

Please be advised that the Beausoleil First Nation Lands Department personnel will be conducting random lot and exterior building inspections. These inspections will determine whether expectations are being met with codes and standards.

Surveys identifying frontage on all waterfront lots at both Big Sand Bay and Lighthouse Subdivisions will also be conducted utilizing Global Positioning System (GPS) co-ordinates. All waterfront properties will have clearly identifiable lot markers/stakes installed. These markers are expected to be permanent fixtures, so we ask that they not be removed or tampered with once installed.

This is to clarify any boundary issues that have happened in the past and to avoid any issues that may arise.

Also be advised that in the very near future, signage will be posted at the end of each lane (beachside), clearly outlining the rules and expectations for beach use by both the cottager population and the public.

If you should have any questions or concerns, please feel free to contact our office.

Sincerely,

Kristin Monague
A/Lands Manager
