

Bringing High-Speed Communications Services to Beausoleil First Nation

Dear Beausoleil First Nation Member,

Broadband North is pleased to share exciting news—fibre-optic technology is coming to Beausoleil First Nation! With support from the Government of Canada and Ontario, we are moving forward with the project to deliver high-speed, reliable telecommunications services directly to members of the Beausoleil community.

This upgrade will ensure members have access to fast, dependable internet that supports education, healthcare, work, and everyday life. It marks an important step forward, and we are honoured to help bring this service to Beausoleil First Nation.

To receive future services, access to your property is required to install a buried wire. We must receive a completed Property Authorization and Interest Form to complete this work.

Without this form, installation at your residence cannot take place. Please complete the Property Authorization and Interest Form by following the link below or scanning the QR at the bottom:

[Link to Form: Property Authorization & Interest Form](#)

Broadband North has partnered with Ramkey Communications and Solo Cable Solutions to complete the installation. Together, we are committed to making the process smooth, efficient, and respectful of Beausoleil First Nation.

Once services have been installed in your area, you will be able to sign up for new options, including:

-  High-Speed Fibre Internet
-  TV Services
-  Home Phone Services

For more details on available plans, please visit www.broadbandnorth.com.

Broadband North looks forward to connecting Beausoleil First Nation with advanced technology that will support continued growth and prosperity for years to come.

Sincerely,
The Broadband North Team
